This paper highlights the key results and trends emerging from our annual statistics. These statistics are gathered from calls to the HelpLine taken by HelpLine Advisers, and from client details collected by Counsellors. These statistics can be used as an indicator of trends, however they are not collected for, nor do they have integrity as a dataset for academic purposes in their own right.

**Key messages**
- Calls from problem gamblers and affected others increased by 18% to 27,056
- Clients in treatment increased by 39% to 5,500
- Consistent pattern across years in 2013/14 and 2014/15 of disclosure among HelpLine callers and clients in treatment around gambling activities and facilities used

**HelpLine**
(Please see Appendix A for a breakdown of definitions used)
